Dear Lis.

There was no report of the trial of Mer Baker - nothing but a meagre account of the anderes . - The Defence was not insurely, but self defence -The proved a threat on the part of Affinan to Come her to go with him - if she world not yield to him. We formed that she alarmed. when he was at of her presence, let C. Fitch he might come - and we used that his presence on the streetinspired terror. Apprehending danger- che had a night to pursue him tell she was not of it. It was an internely

interesty Case - but there y no recend left of the efforts made - sure in the Verdiet - It is regarded as a professional trumph. I do not so theik - her acquittal I thought a thing of Course . -For the last ways I have been engaged in a Much harder Cese (net yet ended) - declisori, case for the home eide of Gudlan - and that I enfect to www.
